Abstract Submission Best Practices

The following are a few Best Practices to keep in mind when submitting your abstract for consideration by the judge panel:

1) The BD online grant application form accepts abstracts only. Please do not attempt to send additional data or attachments with your abstract.

2) The abstract length is 850 words or fewer. References need not be included.

3) In the abstract, describe your research project in detail, including how BD Biosciences reagents will be used in achieving the project's goals.

4) Do not include names of scientists or institutions involved with the research project in the abstract. This is to ensure full impartiality by the judges.

5) Proofread your abstract before you submit it to ensure that it is free of major spelling and grammatical errors and complies with American or British English language standards.

6) Do not use special characters or symbols in the abstract. Use the English word equivalent in place of characters or symbols (eg, "beta" for β).

Send any questions regarding submissions or the grant program to grant^˘@^˘¦[ ]^ḃd.com (for immunology grants) or scgrant@bd.com (for stem cell grants).

Thank you and best of luck!

BD Biosciences

The BD Biosciences Research Grant Program aims to reward and enable important research by providing vital funding for scientists pursuing innovative experiments to advance the scientific understanding of disease.
