3.11 The Netherlands

	Country	The Netherlands

2	National programme management & project funding agency	ZonMw, the Netherlands Organization for Health Research & Development www.zonmw.nl
3	National Contact Person	Geja Langerveld, langerveld@zonmw.nl , +31 (0)70 349 5158
	Eligible organisations	<p>The objective of the Netherlands participation in AAL is the availability on the market and take-up / implementation of ICT-based solutions for Dutch seniors, their family/social networks and the Dutch care and social support system within ca. 2 years after the project.</p> <p>To achieve this the following national Dutch eligibility criteria are applicable.</p> <ol style="list-style-type: none"> 1. To be eligible for funding in The Netherlands, a group of Dutch partners has to be involved as partners in the project consortium. This group should include at least: 2. One Dutch primary and/or secondary and/or tertiary end user organisation⁶ intending to act as a ‘launching customer’ of the AAL solution (if successful). A ‘launching customer’ can be a senior organisation, a care or welfare organisation, a municipality, a health insurance company, a housing cooperation etc. 3. The Dutch end user organisation(s) must take part in the pilots with a <u>considerable number of end users</u> 4. An <u>end user partner</u> can take part <u>in only one funded project</u> in AAL call 2017!

1.1 ⁶ Definition of end-users in the AAL Joint Programme:

Primary end-users are older adults who are actually using AAL products and services. This group directly benefits from AAL solutions by increased quality of life. Primary end user organizations are organizations who represent older adults (e.g. senior organizations/cooperations etc.)

Secondary end-users are persons or organisations directly in contact with primary end-users, such as formal and informal care persons, family members, friends, neighbours, care organisations and their representatives. This group benefits from AAL directly when using AAL products and services (at a primary end-user's home or remote) and indirectly when the care needs of primary end-users are reduced.

Tertiary end-users are such institutions and private or public organisations that are not directly in contact with AAL products and services, but who somehow contribute in organizing, paying or enabling them. This group includes the public sector service organizers, municipalities, social security systems, insurance companies, housing corporations etc.. Common to these is that their benefit from AAL comes from increased efficiency and effectiveness which result in saving expenses or by not having to increase expenses in the mid and long term.

		<p>5. One Dutch company that will make the solution available for the Dutch market and will provide (technical) support to end user organisations in the Netherlands after the project.</p> <p>Financial viability and business soundness of Dutch enterprises and organizations will be verified.</p>																
4	Funding quota	<p>N.B. The maximum financial contribution for Dutch partners is € 500.000,-- per AAL project (not per partner).</p> <p>The following funding rates will be applied to different types of organizations, who are <u>not</u> engaging in ‘economic activities’:</p> <table><tr><th>Type of organization (not-for-profit)</th><th>Max. funding rate</th></tr><tr><td>Primary End users organizations (organizations of seniors, patients etc.)</td><td>75%</td></tr><tr><td>Secondary End user organisations (care / welfare organizations etc.)</td><td>65%</td></tr><tr><td>Tertiary End User organisations (local/provincial governments)</td><td>50%</td></tr><tr><td>Other organizations (research institutes, knowledge centres etc.)</td><td>70%</td></tr></table> <p>In case of <i>enterprises</i>⁷ the funding rates for Experimental Development will be applied according to the EC state aid rules for R&D&I. The funding rate depends on the size of the enterprise and takes into consideration the international cooperation in AAL projects.</p> <table><tr><th>Type/size of enterprise</th><th>Max. funding rate</th></tr><tr><td>SME /Small sized enterprise</td><td>60%</td></tr><tr><td>SME⁸ / Medium sized enterprise</td><td>50%</td></tr></table>	Type of organization (not-for-profit)	Max. funding rate	Primary End users organizations (organizations of seniors, patients etc.)	75%	Secondary End user organisations (care / welfare organizations etc.)	65%	Tertiary End User organisations (local/provincial governments)	50%	Other organizations (research institutes, knowledge centres etc.)	70%	Type/size of enterprise	Max. funding rate	SME /Small sized enterprise	60%	SME ⁸ / Medium sized enterprise	50%

Other organizations (research institutes, knowledge centres etc.)	70%

SME /Small sized enterprise	60%																	
SME ⁸ / Medium sized enterprise	50%																	

⁷ Enterprises are defined as undertakings which are legal persons engaging in economic activities. According to settled EU case law an economic activity is "any activity consisting in offering goods and services on a given market". This can apply also to research organizations, care providers etc.

It is the responsibility of the proposing organizations to assess if the activities for the AAL project are subject to the EC state aid rules
