

# Training Overview

EI<sub>3</sub>POD comes with a defined set of training requirements designed to give insight into the ethical, societal and applied corporate aspects of science. The programme aims to prepare a cohort of EI<sub>3</sub>POD researchers appropriately equipped for a wide variety of career paths in the life science sector. The training modules are expected to be completed by fellows within the first 18 months of their fellowships.

## Mandatory training modules

- Intellectual property
- Entrepreneurship in life sciences
- Research ethics
- Career Development
- Gender dimension in science
- Outreach, public engagement and dissemination of knowledge on scientific progress

## Optional training modules

- Corporate Summer School: including lectures and tutorials by experts in the field, site visits and field trips
- Entrepreneurship-targeted e-learning activity
