## About Grants

The Company of Biologists uses the surplus it generates for the benefit of biology and the biological community. We support and encourage the sharing of knowledge across the biological community. We make the following financial contributions to support biologists:

- Meeting Grants – for both large and small meetings. We support meetings, workshops and conferences in the fields covered by our journals, around the world.
- Travelling Fellowships – to graduate students and post-doctoral researchers wishing to make collaborative visits to other laboratories. We make contributions of up to £2,500 to offset the cost of travel and other expenses. These have no restriction on nationality.
- Grants to scientific societies – both large and small. Three of the societies we fund (British Society for Developmental Biology (<http://bsdb.org/>), British Society for Cell Biology (<http://bscb.org>) and the Society for Experimental Biology (<http://www.sebiology.org>)) use part of our funding to provide travel grants in order to support early career scientists who wish to attend conferences.

We believe in ensuring everyone has the opportunity to share and benefit from scientific discovery. For this reason our journals are included in the HINARI (<http://www.who.int/hinari/en>), AGORA (<http://www.fao.org/agora/en>) and OARE (<http://www.unep.org/oare/>) initiatives. These provide free and unrestricted access for the world's poorest nations to environmental and biomedical literature.

## Scientific Meeting Grants

**Individuals wishing to apply for travel grants should contact the British Society for Developmental Biology (<http://bsdb.org/>), the British Society for Cell Biology (<http://bscb.org>) or the Society for Experimental Biology (<http://www.sebiology.org>).**

Applications are invited from the organisers of a range of charitable activities, including – but not limited to – meetings, workshops and conferences in the fields covered by our journals. Organisers may use a grant from The Company of Biologists in a variety of ways, for example to meet the expenses of a plenary or keynote speaker, assist with travel for early career scientists, or to reduce (or waive) registration fees.

It is necessary under the law of England and Wales, for grants to be provided on terms which enable us to verify that the funding provided has been put to proper use and monitor it, in furtherance of our charitable purposes. As such, our grants

We want to make our website, and the services we provide, useful and reliable. This sometimes involves placing small amounts of information called cookies on the device you used to access the internet. If you continue to use this website we will assume you agree to accept them on the terms offered.

Our Grant Agreement is attached to the application form for information.

Accept (/)

#### Guidelines for completing the application form:

- The applicant who completes the form must be in the organising group for the meeting. Applications from professional fund-raisers will not generally be considered.
- Incomplete application forms will not be considered.
- We are unable to fund 'core costs' (or overheads).
- Information on the topics/programme outline, speakers/proposed speakers must be included with the application form. Please keep this information to a maximum of six pages in total.
- Please note that whilst the quality of science remains paramount, The Company of Biologists would prefer to support meetings and events where organisers have sought maximal feasible diversity in speakers in terms of geography, gender and age. In addition, where attendance at events is selective, then we would expect such issues to also be influential. We invite applicants to make a statement on these issues in their application for funding.
- Funding requests must be in GB Pounds Sterling.
- Application forms and supporting information must be written in English.

**Acknowledgement of funding:** As part of our agreement to provide funding, we request that should your application be successful, you acknowledge The Company of Biologists' contribution to the meeting on your website and in any printed material circulated about the event. We would ask that this acknowledgement include our company name, logo and web address. Upon grant approval we will issue a non-negotiable Grant Agreement which will need to be signed and returned along with your bank details. We also require a 250–500 word summary of the meeting including an assessment of the impact and outcome of the meeting within 3 months of the meeting date. If you have any questions regarding these grants, please contact <mailto:grants@biologists.com> (<mailto:grants@biologists.com>).

## Grants to hold a Small Meeting

The Company of Biologists will consider applications for a grant towards the cost of holding a small meeting within the fields of our journals. This would normally be a local meeting with a small budget. Support requests for aspects of large meetings will not be considered for a Small Meeting Grants. Applications should include the title and location of the meeting, full details of costs, other sources of finance already obtained or applied for and any other relevant details.

Criteria for funding:

- Level of funding not exceeding £400
- Total meeting budget not to exceed £1,000
- Meeting to take place on one day
- Meeting not to be part of a larger meeting or organisation
- Only one application per year will be considered
- Funding will not be made retrospectively

Please note that incomplete applications will not be considered. Applicants will generally be informed of the funding decision within four weeks of receipt of application.

When will I be notified of the outcome of my application?

Applications are initially evaluated by the Grants Committee, who selects a short-list to be recommended to the Board of Directors. If your application is unsuccessful at this stage, you will be notified immediately. The Board of Directors then review the recommendations of the Grants Committee, following which successful applicants will be contacted. You will be required to sign our non-negotiable Grants Agreement and provide bank details to enable funds to be electronically transferred.

What is the maximum funding available?

Although there are no rigid rules, we would normally expect grants to be broadly proportional to the size of the meeting. Typically, they are awarded on a sliding scale where meetings with fewer than 100 people are given up to £2,000, or over about 400 people up to £6,000. These limits can be exceeded in exceptional cases, but special justification is required.

What will not be funded?

- Expenditure on capital equipment and capital building proposals
- Removal expenses
- Undergraduate expeditions and courses
- Prizes, e.g. posters
- Social/political networking
- Conference dinners/social events/refreshment breaks
- Tuition fees
- Payments for the employment of staff
- Abstract books
- Series of meetings year on year
- Intra-institutional events, e.g. departmental seminars, etc.
- Indirect costs

Can we invoice The Company of Biologists for the value of the grant?

As this funding is a grant and not sponsorship, we do not require an invoice.

Can we request a change to the terms of the Grants Agreement?

It is not possible for The Company of Biologists to accept any changes to the Grants Agreement. If you are unable to accept the terms offered, we will consider your request for funding withdrawn.

## DMM Conference Travel Grants

**Disease Models & Mechanisms** (<http://dmm.biologists.org/>)(DMM) offers Conference Travel Grants of up to £600 (or currency equivalent) to early career scientists wanting to attend meetings and courses relating to the areas of research covered by the journal. We also welcome applications from independent group leaders and PIs with no independent funding.

## Experimental neuroscience takes to the hills

The Transylvanian Experimental Neuroscience Summer School (TENSS) grew from an idea shared between Florin Albeanu and Raul Mureşan during a conference in Romania in 2010. Two years later, the first TENSS took place on the shores of Pike Lake in the picturesque province of Transylvania, Romania. ...
