## FEBS | EMBO Women in Science Award

10

The **FEBS | EMBO Women in Science Award** is a joint initiative of FEBS and EMBO. Launched in 2007, the aim of the award is to highlight the major contributions made by female scientists to life sciences research. Winners of the award will serve as inspiring role models for future generations of women in science.

Each year an individual woman working in the life sciences will be recognized for her exceptional achievements. The winner will be honoured at the annual FEBS Congress, where she will receive a prize of €10,000 and a statuette\*, and present a special plenary lecture.

The winner of the **2022 FEBS | EMBO Women in Science Award** is Erin Schuman (Max Planck Institute for Brain Research, Frankfurt, Germany); see the press release in the [news section](#) of the website to read about her selection and career. Previous winners were Molly Stevens (2021), Elly Tanaka (2020), Sara Linse (2019), Frauke Melchior (2018), Ottoline Leyser (2017), Fiona Watt (2016), Caroline Dean (2015), Pascale Cossart (2014), Geneviève Almouzni (2013), Susan Gasser (2012), Carol Robinson (2011), Ingrid Grummt (2010), Anne Houdusse (2009) and Naama Barkai (2008).

### Nomination and selection

Nominees should be female scientists working in an [EMBC Member State](#) or [FEBS member country](#), who have made outstanding contributions to life sciences research and significantly advanced our understanding of a particular discipline in the last five years in Europe. The award is generally not meant to be for lifetime achievements. Their research can cover any area of the life sciences including agricultural and biomedical research.

### Nominations for the FEBS | EMBO Women in Science Award

Nominations for the 2023 FEBS | EMBO Women in Science Award will close on 15 October 2022.

- The following documents are required: (1) the filled [FEBS | EMBO Women in Science Nomination Form](#), (2) letters of support from two other scientists, and (3) the nominee's CV (max. three pages).
- The nomination form asks the nominator to give details of the nominee's contribution(s) to the field and describe any outstanding achievements. Please include evidence of international recognition, leadership and mentorship qualities, as well as honours and awards. The support letters should come from two additional scientists (i.e. not the nominator). The committee finds it informative to have an overview of the candidate's career, but is most interested in contributions within the last five years.
- There is no requirement for the nominee, nominator or supporters to be associated with EMBO or FEBS.
- Please submit the documents via the EMBO website [here](#).

An award committee will evaluate the nominees and make the selection. The official announcement will be made via a press release prior to the FEBS Congress.

### Award ceremony

The awardee is expected to receive the award in person at the FEBS Congress; exceptions can be made only under special circumstances, such as ill health. The recipient of the award is expected to give a plenary lecture at the FEBS Congress. During the award ceremony she will receive a cheque of €10,000 and a commemorative statuette. The awardee's travel and accommodation will be covered.

For further information from FEBS concerning the FEBS | EMBO Women In Science Award and/or the nomination process, please contact the FEBS Women in Science Working Group Chair via the [Contact Us](#) section of the website.
