

# Grants from the Scientific Foundation of the Spanish Association Against Cancer

## Amendment to the Application Guidelines AECC TALENT MSCA COFUND postdoctoral fellowships

Due to a detected misalignment between the regular FCAECC call procedures and the description of action contained in the Grant Agreement 101081298 under which the AECC Talent Postdoctoral fellowships are cofunded by the European Union the following changes to the guidelines are implemented with the present document.

### Amendment to section 2.2. Incompatibilities

On page 8 the guidelines state:

*Project Director*

*Each Project Director may only endorse and host one applicant for this programme. In case more than one application with the same Project Director is submitted, these will be automatically rejected. Applicants will have to ensure these points when contacting potential supervisors.*

Modification:

To comply with the GA no limitation or incompatibility will be established for the Project Director in regard to the number of endorsed candidates at the application stage, thus there will be no limit to the number of applicants per research group.

### Amendment to section 3.1. Required documents.

On page 9 the guidelines state:

*4. Letter of commitment from the target research centre*

Modification:

Aligned with the point described above this document will not be required either at the application stage.
